HOW FRESH IS YOUR CONTACT DATA?

■ Under 1 year — 51,229 (45.5%) ■ 1-2 years — 61,304 (54.5%) ■ 2+ years — 0 (0.0%)

WHAT THIS MEANS

Your contact data is fresh relative to the portfolios we manage, and fresh numbers connect at higher rates. The priority here is simply maintaining that edge with a steady refresh cadence.

RECOMMENDED NEXT STEPS

- 1 Put the 1-2 year band on a rolling refresh.** 61,304 records are approaching the stale window. Refreshing them on a regular cadence keeps your portfolio weighted toward higher-yield data.
- 2 Maintain your current refresh cadence.** Your contact data is in good shape. Keep your current cadence and we'll re-check the age profile in about six months.
- 3 Keep wrong numbers in check.** 2,552 numbers (2.3%) are flagged — a low rate. Periodically recycling them through a fresh skiptrace keeps caller productivity high.
