WHAT THIS MEANS

Your contact data is fresh relative to the portfolios we manage, and fresh numbers connect at higher rates. The priority here is simply maintaining that edge with a steady refresh cadence.

RECOMMENDED NEXT STEPS

- 1 Refresh your oldest records first.** The 38,049 properties with 2+ year-old data are the priority cohort — re-skiptracing these is where a fresh pull recovers the most reachable numbers.
- 2 Put the 1-2 year band on a rolling refresh.** 57,112 records are approaching the stale window. Refreshing them on a regular cadence keeps your portfolio weighted toward higher-yield data.
- 3 Maintain your current refresh cadence.** Your contact data is in good shape. Keep your current cadence and we'll re-check the age profile in about six months.
