52.5%

is 2+ years old
262,110 properties

HOW FRESH IS YOUR CONTACT DATA?

Under 1 year — 46,014 (9.2%) 1-2 years — 191,461 (38.3%) 2+ years — 262,110 (52.5%)

WHAT THIS MEANS

Phone numbers go stale as people change carriers and move. Records gathered 2+ years ago connect at meaningfully lower rates and produce more disconnected or wrong numbers on the dial. A targeted refresh of the oldest records is the highest-impact step to lift your connect rate.

RECOMMENDED NEXT STEPS

- 1 Refresh your oldest records first.** The 262,110 properties with 2+ year-old data are the priority cohort — re-skiptracing these is where a fresh pull recovers the most reachable numbers.
- 2 Run a wrong-number cleanup.** 51,359 numbers (10.3% of your portfolio) are flagged as wrong. Submit the older ones to a fresh skiptrace and recycle the recovered numbers back into the dialer.
- 3 Put the 1-2 year band on a rolling refresh.** 191,461 records are approaching the stale window. Refreshing them on a regular cadence keeps your portfolio weighted toward higher-yield data.
