

# Kentucky Real Estate

# 49.9%

of your contact data is 2+ years old — the largest refresh opportunity in your portfolio.

## 75.7%

is **1+ year** old  
78,572 properties

## 49.9%

is **2+ years** old  
51,847 properties

### HOW FRESH IS YOUR CONTACT DATA?

■ Under 1 year — 25,230 (24.3%)   ■ 1-2 years — 26,725 (25.7%)   ■ 2+ years — 51,847 (49.9%)

### WHAT THIS MEANS

Phone numbers go stale as people change carriers and move. Records gathered 2+ years ago connect at meaningfully lower rates and produce more disconnected or wrong numbers on the dial. A targeted refresh of the oldest records is the highest-impact step to lift your connect rate.

### RECOMMENDED NEXT STEPS

- 1 Refresh your oldest records first.** The 51,847 properties with 2+ year-old data are the priority cohort — re-skiptracing these is where a fresh pull recovers the most reachable numbers.
- 2 Put the 1-2 year band on a rolling refresh.** 26,725 records are approaching the stale window. Refreshing them on a regular cadence keeps your portfolio weighted toward higher-yield data.
- 3 Keep wrong numbers in check.** 770 numbers (0.7%) are flagged — a low rate. Periodically recycling them through a fresh skiptrace keeps caller productivity high.
