69.5%

of your contact data is 2+ years old — the largest refresh opportunity in your portfolio.

96.9%

is **1+ year** old
594,675 properties

69.5%

is **2+ years** old
426,576 properties

HOW FRESH IS YOUR CONTACT DATA?

■ Under 1 year — 18,754 (3.1%) ■ 1-2 years — 168,099 (27.4%) ■ 2+ years — 426,576 (69.5%)

WHAT THIS MEANS

Phone numbers go stale as people change carriers and move. Records gathered 2+ years ago connect at meaningfully lower rates and produce more disconnected or wrong numbers on the dial. A targeted refresh of the oldest records is the highest-impact step to lift your connect rate.

RECOMMENDED NEXT STEPS

- 1 Refresh your oldest records first.** The 426,576 properties with 2+ year-old data are the priority cohort — re-skiptracing these is where a fresh pull recovers the most reachable numbers.
- 2 Put the 1-2 year band on a rolling refresh.** 168,099 records are approaching the stale window. Refreshing them on a regular cadence keeps your portfolio weighted toward higher-yield data.
- 3 Turn on wrong-number tracking in your dialer.** No wrong-number dispositions are being captured today — enabling this lets us measure and automatically clean bad numbers going forward.
